- **Web:** HTML, XML, CSS, web services
- **Network:** TCP/IP, client/server, sockets
- **Concepts:** Project management, technical writing, object oriented design, design patterns, system services, multithreading, synchronization, message queues, low-level debugging, embedded systems, kernel device drivers

Clients have included Synergis Systems LLC, Phantom Entertainment Inc., Driver Development Corp, OCENS Inc., Opteon Corp, and Datalight Inc.

Steven Houchin earned a B.S. in Computer Science from Washington State University, followed by a successful twenty-five year professional career as a developer, senior software engineer, and project manager with Boeing Computer Services, Tektronix Inc., Seattle Lab Inc., and BVRP USA Inc., before founding Forest Park Lab in 2002.

Professional Software Design and Development

Forest Park Lab's mission is to provide clients with project-oriented or long-term software development services, and help with technical writing and editing.

Excellence, experience, teamwork, attitude, and thoroughness are all qualities that companies look for when they consider hiring a software developer. **Steven Houchin**, an independent contract developer and owner of Forest Park Lab, can offer your company the above qualities and the immediate productivity that broad experience and a sound work ethic provide.

We specialize in software development services for the Windows and Mac OSX operating systems.

Your company will benefit from hiring an independent contract developer in many ways:

- ✓ Immediate productivity
- ✓ Broad, diverse background
- ✓ Personal, ongoing relationship for future projects
- ✓ Lower cost than the big agencies
- ✓ Flexibility
