**Steven Houchin** earned a B.S. in Computer Science from Washington State University, followed by a successful twenty year professional career as a developer, senior software engineer, and project manager with Boeing Computer Services, Tektronix Inc., Seattle Lab Inc., and BVRP USA Inc., before founding Forest Park Lab in 2002.

## *Professional Software Design and Development*

**Forest Park Lab's** mission is to provide clients with project-oriented or long-term software design and development services, and help with technical writing and editing.

**Excellence**, experience, teamwork, attitude, and thoroughness are all qualities that companies look for when they consider hiring a software developer. **Steven Houchin**, an independent contract developer and owner of Forest Park Lab, can offer your company the above qualities and the immediate productivity that broad experience and a sound work ethic provide.

We specialize in software development services for the Windows and Windows CE operating systems.

**Your company** will benefit from hiring an independent contract developer in many ways:

- Immediate productivity
- Broad, diverse background
- Personal, ongoing relationship for future projects
- Lower cost than the big agencies
- Flexibility
